

Associate Professor, Department of Geography, Universidad Autónoma de Santo Domingo (UASD), Santo Domingo, Dominican Republic.

dherrera88@uasd.edu.do

Research interests

- Tropical hydroclimate variability & atmospheric dynamics
- Climate change & food security
- Global and regional climate modeling
- Human-environment interactions & water resources
- Land-atmosphere interactions
- Aerosols and hydroclimate variability
- Seasonal drought forecasting

Education

Cornell University	Atmospheric Sciences	Ph.D. 2014–2018
Cornell University	Atmospheric Sciences	M.S. 2014–2017
Universidad Nacional Autónoma de México (UNAM)	Earth Sciences	M.S. 2008–2011
Universidad Autónoma de Santo Domingo (UASD)	Geography (summa cum laude)	B.S. 2003–2007

Professional Appointments

2022–present	Assistant Professor, Dept. of Geography & Sustainability, University of Tennessee, Knoxville, TN, USA.
2014–present	Adjunct Associate Professor, Dept. of Geography, Universidad Autónoma de Santo Domingo (UASD), Santo Domingo, Dominican Republic.
2018–2020	Postdoctoral Associate, Dept. of Earth and Atmospheric Sciences, Cornell University, Ithaca, NY, USA.
2014–2018	Graduate Research Assistant, Dept. of Earth and Atmospheric Sciences, Cornell University, Ithaca, NY, USA.
2017	Graduate Teaching Assistant, Dept. of Earth and Atmospheric Sciences, Cornell University, Ithaca, NY, USA.
2017	Graduate Visitor, National Center for Atmospheric Research (NCAR), Boulder, CO, USA.
2011–2014	Assistant Professor, Dept. of Geography, Universidad Autónoma de Santo Domingo (UASD), Santo Domingo, Dominican Republic.

Publications

Fieldwork experience

- [1]. Chalco Lake coring campaign (2008-2011) Universidad Nacional Autónoma de México (México). As a graduate student in Earth Sciences, I collaborated with the logistics during the 2008-2011 coring campaigns in Chalco Lake (Mexico City). This work included the storage of the recovered lacustrine cores and post-coring stratigraphical description.

- [2]. Physical Geography (2011-2014) Universidad Autónoma de Santo Domingo (Dominican Republic). I organized and conducted field trips as part of an introductory class in Physical Geography with students majoring in Geography across the Dominican Republic. Fieldwork included assessing local landscape (e.g., analyzing vegetation, climate, land use, soil characteristics, hydrology, and geomorphology) and mapping the findings using QGIS and remote sensing (Google Earth and other satellite images).
- [3]. Introductory Geology (2011-2014) Universidad Autónoma de Santo Domingo (Dominican Republic). I organized and conducted field trips as part of an introductory class in Geology to sophomore students majoring in Geography. Fieldwork usually lasted a couple of days, and the students were able to analyze both the lithology and structural characteristics of the places visited. As in Physical Geography, the final product from these trips was a geology map (1:50,000) using local topographic maps (1:50,000) and a geological map (1:250,000) of the Dominican Republic as a reference.
- [4]. Biogeography and geomorphology (2011-2014) Universidad Autónoma de Santo Domingo (Dominican Republic). Along with colleagues in the Departments of Geography and Biology at Universidad Autónoma de Santo Domingo, I organized and conducted field trips with junior and senior students majoring in Geography and Biology. These fieldworks included the estimation of plant diversity and descriptions of soil profiles and local geomorphology. The final products of these field trips included geomorphological maps and vegetation distribution.
- [5]. Dendrochronology (2018-2019) Cornell University and University of Arizona (USA). I organized and conducted fieldwork in the highlands of the Dominican Republic to collect tree ring cores of *Pinus occidentalis*. The goal of this work is to construct the first chronology from tree-rings in the Caribbean based on previous exploratory research.
